EMCO GEARS JOINS FORMULA ENTERPRISES RANKS

Industry leader will supply gears to junior formula car class

CENTENNIAL, COLO. (November 1, 2011) – SCCA Formula Enterprises is excited to announce industry leader EMCO Gears is joining the Formula Enterprises community, becoming a gear supplier for the growing junior formula car class.

One of the goals of the Formula Enterprises car since its creation was to offer racers the 'best bang for the buck'. In order to achieve this endeavor, SCCA Enterprises has worked with quality manufacturers and suppliers over the years. Their latest partner is Indiana-based EMCO Gears, with the premier manufacturer entering the Formula Enterprises ranks as a supplier. EMCO Gears is will now manufacture gears, lay shafts, hubs and dog rings for FE cars competing in both SCCA Pro Racing and SCCA Club Racing, with sales and distribution directly to the customer.

"In our extremely tightly controlled spec class it was a calculated risk to leave the transmission components open to any manufacturer to follow the design requirements for supplying parts," stated SCCA Enterprises President & CEO Erik Skirmants. "Stepping to the side and not being in the supply chain of any part for our cars is rare, but with the addition of EMCO Gears to the mix of gears suppliers for the Formula Enterprises, we know it was the right decision. We welcome EMCO and are proud that a company of their reputation noticed the Formula Enterprises car and is now part of our supply community."

"EMCO Gears is fortunate to find partners like SCCA FE and their competitors to service," said Dan L. Cota, EMCO Gears Director of Racing. "The teams in their pursuit of excellence should have the best products available so that the young drivers they are training get the most seat time possible."

EMCO Gears enters the Formula Enterprises gear supplier market, which is open to any manufacturer who meets the class regulations, as a premier American manufacturer of motorsport transmissions and drive line equipment, EMCO Gears is well established in the maintenance and race preparation of motorsport transmissions, giving Formula Enterprises competitors another option for its gear needs, and it will be offering its service via their Indianapolis Indiana Technical center. Orders for the standard FE gear ratios are now being taken at the Indianapolis Indiana Technical center (317-243-3836) for a mid-January delivery.

The 2011 SCCA Pro Racing Formula Enterprises Series season concludes on November 5-6, with Rounds Nine and Ten at Road Atlanta, as part of the historic American Road Race of Champions event.
